## Siempre a la vanguardia del desarrollo sostenible

En Pamesa Cerámica, el compromiso con el medio ambiente guía cada paso. Nuestra gestión ambiental se centra en minimizar el impacto de nuestras operaciones, controlando emisiones atmosféricas, aguas residuales, residuos y ruido, garantizando un respeto máximo por nuestro entorno.

Gracias a la Autorización Ambiental Integrada otorgada por la Generalitat Valenciana y nuestra adhesión al Sistema Integrado de Gestión de Ecoembes, lideramos la recogida y reciclaje de envases, promoviendo prácticas responsables. Además, optimizamos la gestión del agua con un enfoque en su reutilización y eficiencia.

Nuestros productos cuentan con Declaraciones Ambientales de Producto (DAP), certificadas por Aenor, que subrayan nuestra apuesta por la sostenibilidad. Innovamos constantemente con tecnologías avanzadas: desde sistemas de vertido cero y cogeneración de alta eficiencia, hasta la integración de azulejos descartados en nuevos procesos productivos.

Como parte de nuestra política de desarrollo sostenible, lideramos un ambicioso proyecto fotovoltaico que aspira a ser la mayor instalación de autoconsumo en Europa.

En Pamesa Cerámica, tradición e innovación se unen para construir un futuro más respetuoso con el planeta.

## Always at the Forefront of Sustainable Development

At Pamesa Cerámica, our commitment to the environment guides every step we take. Our environmental management focuses on minimizing the impact of our operations by controlling atmospheric emissions, wastewater, waste, and noise, ensuring maximum respect for our surroundings.

Thanks to the Integrated Environmental Authorization granted by the Generalitat Valenciana and our adherence to the Ecoembes Integrated Management System, we lead in the collection and recycling of packaging, promoting responsible practices. Additionally, we optimize water management with a focus on reuse and efficiency.

Our products feature Environmental Product Declarations (EPD), certified by Aenor, underscoring our commitment to sustainability. We constantly innovate with advanced technologies: from zero-waste systems and high-efficiency cogeneration to incorporating discarded tiles into new production processes.

As part of our sustainable development policy, we are leading an ambitious photovoltaic project that aims to become the largest self-consumption installation in Europe.

At Pamesa Cerámica, tradition and innovation come together to build a more environmentally respectful future.

## Toujours à la Pointe du Développement Durable

Chez Pamesa Cerámica, notre engagement envers l'environnement guide chacune de nos actions. Notre gestion environnementale vise à minimiser l'impact de nos opérations en contrôlant les émissions atmosphériques, les eaux usées, les déchets et le bruit, garantissant ainsi un respect maximal de notre environnement.

Grâce à l'Autorisation Environnementale Intégrée accordée par la Generalitat Valenciana et à notre adhésion au Système Intégré de Gestion d'Ecoembes, nous sommes leaders dans la collecte et le recyclage des emballages, promouvant des pratiques responsables. De plus, nous optimisons la gestion de l'eau en mettant l'accent sur sa réutilisation et son efficacité.

Nos produits disposent de Déclarations Environnementales de Produit (DEP), certifiées par Aenor, qui soulignent notre engagement en faveur de la durabilité. Nous innovons constamment avec des technologies avancées : des systèmes zéro rejet et de cogénération haute efficacité à l'intégration de carreaux recyclés dans de nouveaux processus de production.

Dans le cadre de notre politique de développement durable, nous menons un ambitieux projet photovoltaïque visant à devenir la plus grande installation d'autoconsommation en Europe.

Chez Pamesa Cerámica, tradition et innovation s'unissent pour construire un avenir plus respectueux de la planète.

**Un diseño altamente diferencial y de gran belleza, caracterizado por su alto valor decorativo. Este mármol, muestra en sus finas vetas, una infusión acaramelada, pero con matices oscuros. En su esencia se aprecia el efecto del mármol oxidado a causa del paso del tiempo.**

With its timeless beauty and singular design, strong decorative appeal is guaranteed. The slender veins of this marble combine shades of caramel with darker hints of colour, in addition to signs of oxidation slowly built up over time.

*Un design hautement différentiel et d'une grande beauté, caractérisé par sa haute valeur décorative. Ce marbre présente dans ses veines fines un ton caramel, mais avec des nuances sombres. En son essence on observe l'effet du marbre oxydé par le passage du temps.*

# Prince

**La Serie Prince se inspira en la majestuosidad de la Sal de Roca, bloques de sal gema de aspecto refinado y distintivo que se formaron hace más de 250 millones de años en las minas del Himalaya, gracias al lento secado del mar y a la elevación simultánea de la cordillera.**

The Prince Series draws inspiration from the grandeur of Himalayan Rock Salt, refined and distinctive salt gem blocks formed over 250 million years ago in the mines of the Himalayas, thanks to the slow drying of the sea and the simultaneous uplift of the mountain range.

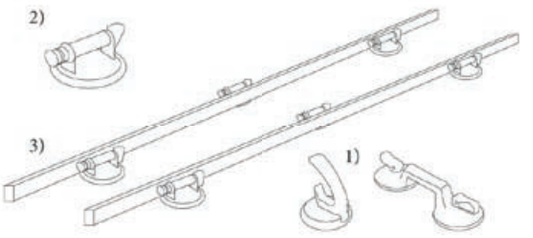
# Transporte XXL
## XXL Moving Slabs / XXL Transport

El transporte de piezas de gran formato exige varios operarios.
Será necesario el uso de ventosas y se podrán usar en todas sus variantes (1).
Para piezas con superficie texturizada se recomienda el uso de ventosas que dispongan de una goma blanda, que garantice la adherencia de las mismas (2).
Para facilitar el manejo y evitar la deformación, se pueden usar barras de transporte (3).
La solución óptima, consiste en el uso de un bastidor rígido, dotado de ventosas, que sujete las piezas en todas direcciones sin deformaciones, posibilitando el transporte con solo dos operarios.

Several workmen will be needed to carry large-format slabs.
Suctions cups will be necessary. Different types can be used (1).
In the case of slabs with a textured surface, soft-rubber suction cups should be used to guarantee a good grip (2).
To handle the slabs more easily and prevent the risk of warpage, carrying bars should be used (3).
The best solution is a rigid frame, with suction cups that grip the slab along all sides. This prevents warpage and allows just two workmen to carry it.



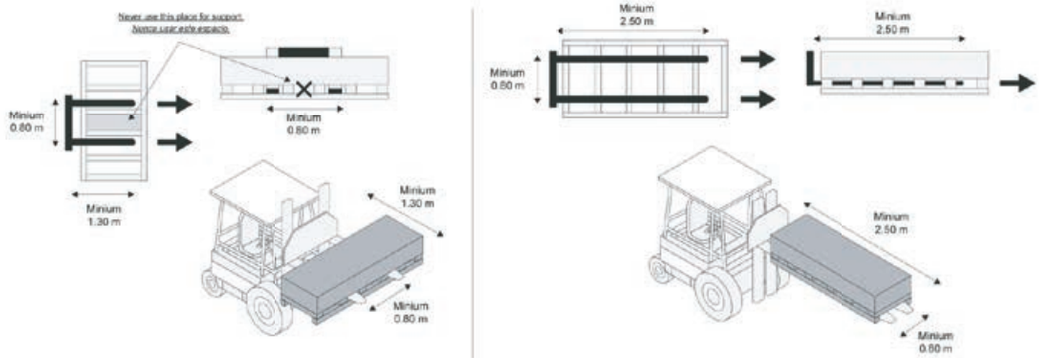
Le transport des pièces de grand format requiert plusieurs opérateurs.
Il sera nécessaire d'employer des ventouses et on pourra lesutiliser dans toutes leurs variantes (1).
Pour les pièces avec une surface texturisée, il est recommandé l'utilisation de ventouses qui ont un caoutchouc mou pouvant garantir leur adhérence (2).
Pour faciliter le maniement et éviter les déformations, on peut utiliser des barrestransport (3).
La meilleure solution est d'utiliser un support rigide muni de ventousespour fixer les pièces dans toutes les directions sans déformations, ce qui permet que deux opérateurs suffisent pour réaliser le transport.

# Recomendaciones de almacenamiento
## Storage recommendations / Recommandations de stockage

Para una correcta manipulación de los cajones, se usará una carretilla elevadora con palas de 2,5 metros de longitud extendidas al máximo.
En condiciones normales, situar las palas en la mitad de la parte más larga del pallet para sujetar la máxima profundidad.
Nunca utilizar el hueco central para cargar.

To handle the crates properly, a fork-lift truck with 2.5-metre-long forks, when fully extended, should be used.
Under normal conditions, the forks should be slid under the middle of the longest side of the pallet so that they support most of the underside.
Never use the central opening in the crates to load them.

Pour une manipulation adéquate des caisses, on utilisera un chariot élévateur de 2,5 m de longueur à son extension maximale.
Dans des conditions normales, les fourches se placent au centre de la partie longue de la palette pour les introduire au plus profond de la palette.
Ne jamais introduire de fourche dans le creux central pour charger.



# Recomendaciones de corte, perforación y acabado
## Cutting, drilling and finishing recommendations
## Recommandations de coupe, perçage et finition

Las grandes dimensiones de las piezas no impiden operaciones de corte, perforación y acabados de cantos y se pueden realizar en la misma obra con el equipamiento adecuado.
Corte con guías de corte en seco
01. Primero se coloca la pieza cerámica en la mesa de trabajo.
02. Se marca la línea de corte, situamos la guía y la fijamos en su posición.
03. A continuación, se raya con el rodel la pieza, marcando los dos primeros centímetros hacía atrás y continuando con el resto de la placa, marcando con fuerza constante hasta el extremo contrario.
04. Para proceder con la separación, se presiona con la tenaza hasta escuchar el sonido de la rotura.
05. Finalmente se separan las piezas restantes con ayuda del borde de la mesa y ejerciendo la fuerza necesaria.

Despite the large dimensions of the tiles, they can be cut, drilled and their edges finished. This can be done on the worksite with appropriate equipment.

DRY-CUTTING USING A GUIDE RAIL
01. First, place the ceramic slab on top of the workbench.
02. Mark the cutting line, and then fix the guide rail into place.
03. Score the beginning of the slab with the cutting wheel, starting two centimetres from the edge and pulling back to the beginning of the slab. Then continue across to the other side, applying constant pressure.
04. To separate the two parts, exert pressure with a pair of pliers until a breaking sound is heard.
05. Use the edge of the workbench to snap the two pieces apart, exerting the necessary pressure.

Les grandes dimensions des pièces n'empêchent pas les opérations de coupe et de perçage et les finitions des chants, et on peut les réaliser sur le propre chantier avec l'équipement adéquat.

DÉCOUPE AVEC GUIDES DE COUPE À SEC
01. Placer d'abord la pièce en céramique sur la table de travail.
02. Marquer la ligne de coupe, situer le guide et le fixer dans sa position.
03. Ensuite, rayer la pièce à l'aide de la molette, en marquant les deux premiers centimètres vers l'arrière puis en continuant sur le reste de la pièce, en marquant avec une force constante jusqu'à l'extrémité opposée.
04. Pour procéder à la séparation, faire pressionavec la pince jusqu'à entendre un bruit de cassure.
05. Finalement, séparer les pièces restantes en s'aidant du bord de la table et en exerçant la force nécessaire.

CORTE CON GUÍAS Y RADIAL
También podemos hacer uso de una guía y una radial con agua.

CUTTING WITH A GUIDE RAIL AND RADIAL TILE SAW
También podemos hacer uso de una guía y una radial con agua.

DÉCOUPE AVEC GUIDES ET DISQUEUSE
On peut également utiliser un guide et une disqueuse à eau.

TALADROS Y AGUJEROS
Para realizar agujeros se deben usar taladros no percutores. Se recomienda empezar con bajas revoluciones y refrigerar con agua.

DRILLING AND MAKING HOLES
To make holes, do not use drills in the hammer mode. Start at a low speed and refrigerate the bit with water.

PERCEUSES ET TROUS
Pour percer des trous on doit utiliser des perceuses sans percussion. Il est recommandé de commencer avec de faibles révolutions et refroidir à l'eau.
